C. Research Support. List selected ongoing or completed (during the last three years) research projects (federal and non-federal support). Begin with the projects that are most relevant to the research proposed in this application. Briefly indicate the overall goals of the projects and responsibilities of principal investigator identified above.

Ongoing

HL04140-01 (McFadden)

9/30/00-6/30/03

NIH-NHLBI

Clinical Research Curriculum Award

Overall goals: K30 training grant for post-doctoral fellows in clinical and health services research.

Role: Co-Investigator

1RO1-AA13302-01A1 (Dawson, N)

09/30/02-08/31/07

NIH-NIAAA

Alcohol Reduction in Medical Illness: HCV as Prototype

Overall goals: to understand factors related to nondependent patients' continuation of alcohol consumption despite a medical contraindication to using alcohol and to develop an instrument to predict continued alcohol consumption.

Role: Co-Investigator

Completed

RO1 - NIAAA (PI: Dawson, NV)

1/1/98 to 12/31/01

Alcohol Screening and Management: A Controlled Study

The major goals for this study are to perform a cluster randomized (firm) trial of alcohol screening, self-help services, and primary care physician training in brief interventions in an ambulatory practice.

(In July of 1999, a supplement of \$49,955 was added to translate the screening instrument into Spanish and perform screening in the Cleveland Hispanic (primarily Puerto Rican) community.)

Role: Co-Investigator

RO1 B AHRQ (PI: Baker, DW)

7/1/99 to 6/30/01

Declining Hospital Mortality in Cleveland: Is it Real?

The central concern of this investigation is whether outcomes of hospital care have improved, as measured by trends in longer-term risk-adjusted mortality rates, during the recent era of increased competition.

Role: Co-Investigator
