

Alexander Turchin is Director of Informatics Research and a practicing endocrinologist at the Division of Endocrinology at the Brigham and Women's Hospital, Assistant Professor of Medicine at Harvard Medical School and a Senior Medical Informatician in the Clinical Informatics Research and Development group at Partners HealthCare. Dr. Turchin graduated from Johns Hopkins School of Medicine and completed a residency in Internal Medicine at Tufts-NEMC, followed by an Endocrinology fellowship at the Brigham and Women's Hospital and a Medical Informatics fellowship at the Harvard-MIT Division of Health Sciences and Technology.

Dr. Turchin's research has centered on quality of care of patients with chronic endocrine diseases including diabetes, hypertension and hyperlipidemia. He has a particular interest in using natural language processing to utilize data in narrative data sources in electronic medical records. Dr. Turchin's research has led to over 40 peer-reviewed publications, including papers in Archives of Internal Medicine, Circulation, Diabetes Care and others. Two of Dr. Turchin's papers were awarded the American Medical Informatics Association Distinguished Paper Award. His work has been funded by AHRQ, National Library of Medicine, Partners IS Research Council, and several private foundations.
