

David Kaelber, MD, PhD, MPH, FAAP, FACP
Associate Professor of Internal Medicine,
Pediatrics, Epidemiology, and Biostatistics
Case Western Reserve University
Director, Center for Clinical Informatics Research & Education
Chief Medical Informatics Officer
The MetroHealth System

ESP (Electronic Support for Public Health)

Description:

The MetroHealth System was the second healthcare system in the US to install the open source Electronic Support for Public Health (ESP) software (<http://esphealth.org>). ESP creates an interface between Epic and the Ohio Department of Health Ohio Disease Reporting System for automatic reporting of diseases that are required to be reported under Ohio law. Dr. Kaelber will report on our experience and results with ESP over the last 2 years.
