

Clinical Research Scholars Program: CRSP 403
[Biostatistics for Clinical Research] Project Presentation Schedule
Friday, December 7, 2007 - Rammelkamp R219

8:30 AM	Marisa Tungsiripat	Association of Clinical Lipoatrophy Assessments with DEXA-measured limb fat and subcutaneous fat mitochondrial DNA levels
8:45	Judy Jin	Utilization of pre-operative patient factors to predict post-operative vitamin D deficiency for patients undergoing gastric bypass
9:00	Florian Rader	Quantitative Measurements on Standard Electrocardiogram for Prediction of Atrial Fibrillation after Coronary Bypass Graft Surgery
9:15	David Kemp	Combination Mood Stabilizer Therapy in Rapid-Cycling Bipolar Disorder: A Double-Blind, Placebo-Controlled Acute Continuation Trial
9:30	Katarina Greer	Effectiveness and Mortality Outcomes of Primary Prophylaxis of Esophageal Variceal Hemorrhage in the Louis Stokes VA Medical Center: A Preliminary Retrospective Assessment
9:45	Vikas Gulani	The effect of MR guided adrenal ablation on blood pressure and biochemical profile
10:00	Cristina Bocirnea	Does hospitalization for a medical illness increase the risk of anemia in people over the age of 65?
10:15	Sonja Harris-Haywood	Rates of Diet, Exercise and Weight Management Counseling for Normal, Overweight and Obese Patients
10:30	Paul Drawz	Development and validation of a predictive model for hospital acquired acute renal failure
10:45	Robert Bermel	Diffusion Tensor MRI and Optical Coherence Tomography as measures of Anterior Visual Pathway Integrity in Multiple Sclerosis

The CRSP 403 course project requires the researchers taking the course to specify a problem, collect/gather data, analyze results and briefly present their findings. **All are encouraged to attend any or all of these 10-minute “abstract-style” presentations.**

Thank you very much,

Thomas E. Love, Ph.D. (Instructor for CRSP 403)
