

Clinical Research Informatics. Cleveland.

Clinical Research Informatics. The Center for Health Care Research and Policy of Case Western Reserve University (CWRU) at MetroHealth Medical Center (MHMC), seeks faculty with interest, experience and scholarship in Clinical Research Informatics. The Center serves as home for Better Health *Greater* Cleveland, a regional EMR-catalyzed program to measure, conduct data aggregation and publicly report the care and outcomes of northeast Ohio's residents with chronic medical conditions.

The Epic electronic medical record has a significant presence in Greater Cleveland, but health information exchange crosses different electronic medical records. On a solid foundation in epidemiologic and public health methods, successful candidates will have demonstrated experience in one or more of the following areas: e-Rx, eClinical Decision Support, ePopulation Management, HIE, chronic disease epidemiology/care, observational studies, comparative effectiveness research, or disparities. Successful applicants will be expected to teach health services research and/or informatics topics and develop an externally funded research program in health services research and/or informatics CWRU and MHMC are equal opportunities employers, minority, and women candidates are encouraged to apply.
